

AEO

Authorised Economic Operator

Gap analysis

Aberdeen & Grampian Chamber of Commerce can help businesses navigate the route to successful AEO status in a number of ways.

AEO gap analysis will see Chamber team members, in partnership with secured customs professionals, prepare a report and assist companies in understanding their current position in terms of capability to meet AEO criteria and what is required in order to be ready for application submission if they wish to do so.

What is the process?

Experienced managers will analyse a company's current business practises, operations, safety and security measures, customs processes, procedures and management tools against the relevant AEO criteria.

The level of support required will reflect the size, scale and complexity of an individual organisations' existing processes and requirements. Prices above or below the suggested level will be agreed in advance but, for guidance, are:

Level 1	Up to 1.5 days	£1,167 + VAT
Level 2	Up to 5 days	£3,955 + VAT
Level 3	Up to 10 days	£8,500 + VAT

Consultancy

Following on from a gap analysis, further consultancy can be provided to submit and obtain AEO status from HMRC.

Detailed arrangements and costs will be discussed following the gap analysis report.
